

## Comment reference proposed AM on FM Rule

As the owner of an AM frequency in Hendersonville, North Carolina, I strongly urge Commissioners to adopt the proposed AM on FM rule. This one simple move will improve service to residents of this community. The reduction of night time power by WTZQ to this community severely hampers residents in gaining local information about many different situations that affect their lives.

WTZQ broadcasts many important announcements during the night time hours that has an affect on Henderson County residents that they simply cannot hear. By allowing WTZQ to offer the same coverage at night as offered by day, county residents would benefit greatly from weather information, public service programming and much more.

In this day of centralized and generic programming of many larger radio stations, I urge you to sincerely provide local programming to more people by implementing AM on FM at your earliest opportunity.

Sincerely,

Randy L. Houston  
WTZQ Radio
